RICHARED DELICIOUS— Trade-Marked)

This strain of common Delicious colors up a solid red two or three weeks earlier but is identical in flavor, size, shape and texture. The Richared originated near Wenatchee, Washington, in the orchard planted in 1910 by G. T. Richardson. Trees of the third generation grown from this original tree have borne fruit true-to-strain.

Wherever the common Delicious thrives, this Richared will prove more profitable because it can be picked and marketed two weeks earlier with solid red color. Windfalls are avoided and the keeping quality is better.
